3. Results and Discussion

The measurements in Figure 3 show the response of the three samples over the full range. Sample A (red) peaks early, while B (blue) and C (green) follow a slower curve. The photo below shows the field site where the samples were collected in the spring.

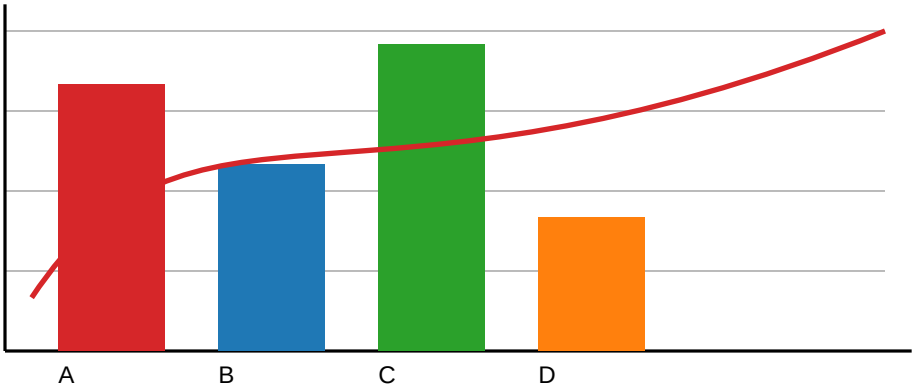

Figure 3. Response by sample.

Figure 4. The field site, looking north.

Further work will extend the series to the autumn samples, with the same method.
